

8. Mini-conference on computational aspects of representation theory

This year there will be again a meeting on representation theory of finite groups - with emphasis on computational aspects - at Lehrstuhl D für Mathematik in Aachen. The exact dates are

Friday 5th and Saturday 6th of December 1997

The main topics of the conference are

- Computation of representations and decomposition numbers of finite groups and finite dimensional algebras.
- The CHEVIE-project and the MODULAR ATLAS-project.
- Algebraic groups and finite groups of Lie type.

The following guests agreed to give a talk:

B. Eick (Würzburg), M. Geck (Paris), W. de Graaf (St Andrews), A. Henke (Oxford), T. Holm (Magdeburg), A. Hulpke (St Andrews), G. Malle (Heidelberg), D. Mattig (Heidelberg), J. Michel (Paris), R. Parker (Shepton Mallet), G. Pfeiffer (Galway), A. Reifegerste (Magdeburg), U. Riese (Tübingen), G. Röhrle (Bielefeld), R. Rossmanith (Jena), A. Steinbach (Eindhoven), R. A. Wilson (Birmingham).

Talks on Friday are planned from 2pm to 6pm and those on Saturday from 10am to 6pm. The talks will be in the same building as Lehrstuhl D, Tempelgraben 64, in the seminar room 221.

Everyone interested in the talks is welcome to attend. There will be much time for discussions between the talks.
